

Amateur Radio

Job Opportunities

Telecommunications, space, TV & radio.

Amateur Radio is the ideal preparation for a future career in a wide range of science, technology and engineering roles.

There is no better hobby than amateur radio if you are seeking a technological career - and it's fun, too! Being a radio amateur can provide employers the ideal demonstration of skills they are seeking. Radio amateurs already provide a large proportion of the skill base in the communications, information and high technology industries. It is said that 30% of Nokia Finland's workforce are radio amateurs. If you are interested in a technical career, amateur radio can provide a stimulating and interesting hobby and a real advantage in the competitive job market.

If you want a fascinating and worthwhile hobby become a radio amateur.
